

XVI SOLANACEAE CONFERENCE

YIELD & NUTRITION

Bettina Hause - Bio

Prof. Dr. Bettina Hause, Leibniz Institute of Plant Biochemistry, Halle, Germany

Bettina Hause studied biochemistry and did her PhD in plant biochemistry at the Martin-Luther-University (MLU) Halle-Wittenberg (Germany). After a Postdoc period at the Agricultural University Wageningen (NL), she worked first as Postdoc and since 1999 she is a group leader at the Leibniz-Institute of Plant Biochemistry (IPB), Halle (Germany). She got her habilitation in 2004; since 2012 she is appointed as Adjunct Professor at the Institute of Biochemistry, MLU Halle-Wittenberg. She gives teaching courses in cell biochemistry for Bachelor and Master Students. She is head of the research group “Jasmonate function & Mycorrhiza” at the IPB and is mainly interested in the function of jasmonates in developmental processes of tomato. In addition, she is heading the “Imaging unit” of the IPB.
