

XVI SOLANACEAE CONFERENCE

YIELD & NUTRITION

Paul D. Fraser - Bio

Prof. Paul D. Fraser, is a Professor of Biochemistry at Royal Holloway University of London and the Head of Plant Microbial Sciences. He has over 20 years' experience working both in academia and industry within the UK and abroad. During this period Prof Fraser has worked on the analysis, biosynthesis, regulation and metabolic engineering of carotenoids and other isoprenoids, both in plant and microbial systems. Prof Fraser coordinated the FP7 METAPRO project, ERAIB-PROCAR and FP7-DISCO projects and acted as the Chair of the management board for the BBSRC Network of Industrial Biotechnology and Bioenergy for high-value products from plants and microorganisms.
