

XVI SOLANACEAE CONFERENCE

YIELD & NUTRITION

Roger T. Chetelat - Bio

Dr. Chetelat oversees the C.M. Rick Tomato Genetics Resource Center, a national and international genebank of tomato mutants, wild relatives, and other genetic stocks. Seed is used by researchers, breeders and educators to facilitate a wide range of studies on tomato. Chetelat's research focuses on the molecular mechanisms of interspecific incompatibility and on introgressing the genome of *Solanum sitiens* into cultivated tomato.
